

Pepita Whitepaper

\$PEPITA is the projects utility token that players will need to hold to take part in the many “Pepita’s Battle” tournaments. “Pepita’s Battle” is an NFT based trading card game.

The more \$PEPITA tokens you hold, the cheaper the tournament entry fees will be and the bigger the prizes for tournament wins.

Why Invest in Pepita?

The \$PEPITA token is scarce. The total supply starting with only 5.000.000 tokens. The project burn mechanism mean that this total supply will continue to decrease overtime, as 5% of every sell transaction will be burnt forever (see “Token Specs” for details).

Profits from every NFT trading card sale will be used to buyback \$PEPITA tokens out of the market and burn forever.

Profits from every “Pepita’s Battle” tournament entry fee will be used to buyback \$PEPITA tokens out of the market and burn forever.

Tokenomics

80% in the Uniswap pool

10% TEAM (12 months lock then 5% monthly release)

5% PROJECT DEVELOPMENT (5% released monthly)

5% MARKETING (5% released monthly)

Token Specs

No single wallet can hold, buy or sell more than 3% of the original total supply.

When someone buy, the 5% of the transaction goes to fund the marketing of the project (set 5% slippage).

When someone sell, the 5% of the transaction goes to fund the marketing of the project, in addition 5% of the transaction burn (set 10% slippage).

There is a 5% transfer tax if you move tokens to another wallet (goes to fund the marketing of the project).

Conclusions

No presale minimizes the risk of cheap tokens being dumped on the market.

We believe that these features will lead the project to increase in value over time.
